Instalação do SSH no Linux

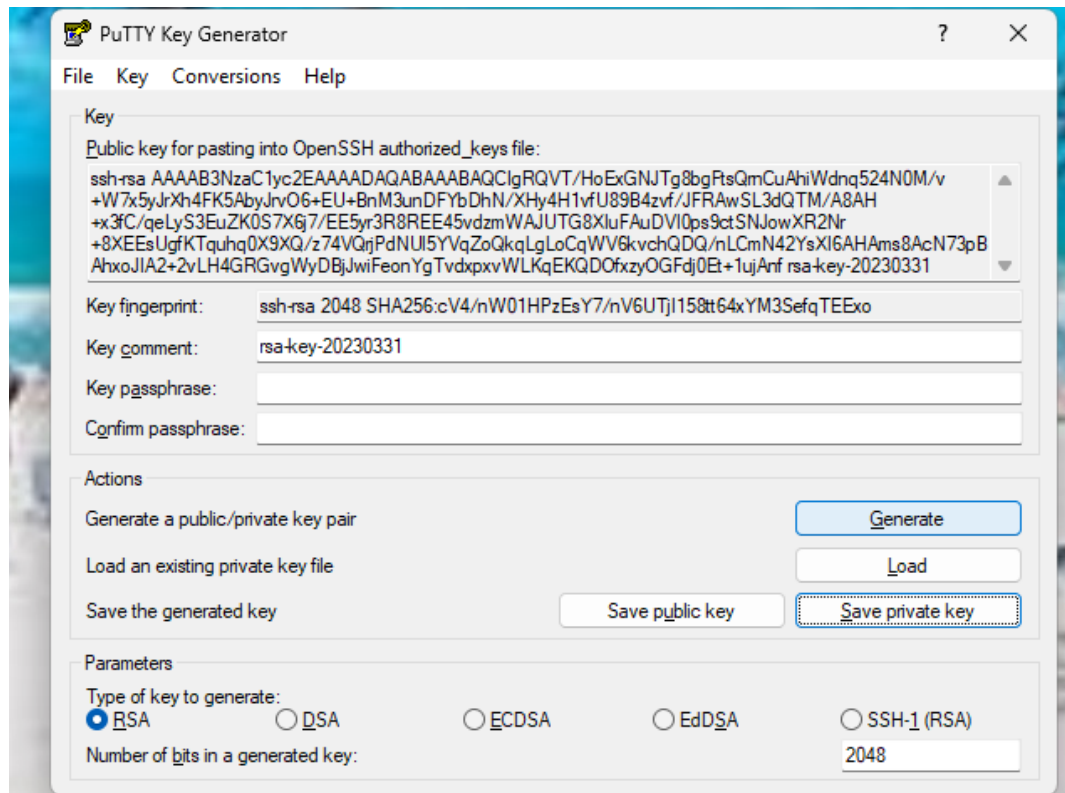

A terminal window titled "Terminal - abimael@Abimael-escola: ~" with a menu bar containing "Arquivo", "Editar", "Ver", "Terminal", "Abas", and "Ajuda". The terminal output shows the installation of SSH on a Linux system. It starts with configuring the openssh-sftp-server and openssh-server packages. Then, it creates a new config file for sshd, generates RSA and ECDSA keys, and an ED25519 key. Finally, it synchronizes the state of the ssh.service with the SysV service script and disables the ssh service.
